

MultiWeigher Sampling Station (SS) Functionality

- Can be used with **any brand and any model** of weighing scales
- **Free Weight Capture / Data Logging** from weighing scales (free with Demo software)
- **Production Monitoring** via Manual Checkweigher functionality
- **Quality Monitoring** via Product Weight Sampling
- **Compliance Monitoring** via Compliance Screening Tests (per NMI V 20 Guidelines)
- **Weight Traceability** to Standard Masses (integrated with Sampling and Screening tests)
- **Tare Validation** guide-through process
- User configurable query search
- User created stored reports
- Reports can be saved in Crystal, PDF, CSV, XLS, DOC, XML, RTF and other formats
- Sample Set Histograms
- Generic Serial Driver designed to work with most serial scales
- 3-level user access – Technician / Administrator / Operator
- Automatically emailed test results
- Easy to set up and configure
- Fully integrated database version, or a simplified non-database (CSV-Excel) version available
- Customisable to specific user requirements.

MultiWeigher Dynamic Weighing (DW) Functionality

Functionality and features as described in the MultiWeigher 3000 brochure (downloadable from Axion website www.axioncs.com/files/MULTIWEIGHER%203000.pdf).

MultiWeigher System Console

MultiWeigher System Console can be used either for In-line weighing (Dynamic Weighing) or for Off-line weighing (Sampling Station). The System Console features are as follows:

Categories	Description	Sampling Station (SS)	Dynamic Weighing (DW)
Products	Edit and View Product Table. Filter options and build up to 10 user defined product reports.	Yes	Yes
Users	Edit and View Users. 1 Standard User report with filtering options.	Yes	Yes
Standard Masses	Edit and View Standard Masses table	Yes (used for Standard Mass Verification)	No
Checkweigher Dashboard	View Current Checkweigher Summary and produce Histogram Report	No	Yes
Scale Dashboard	View Packing Scales Summary	No	Yes
Reports Scale	Reports for Packing Scales. Filtering of user-selectable fields. Build up to 10 user defined reports. Inbuilt Packing Report (per operator) and Histogram	No	Yes
Reports Checkweigher	Reports for Checkweighers. Filtering and build up to 20 user defined reports. Print a Histogram Report on any Checkweigher run	No	Yes
Reports Sample Sets	Reports for Sample Sets. Filtering and build up to 20 user defined reports. Create a Histogram report on 1 to multiple Sample Sets. Includes Standard Sample Set Report for 1 Sample Set. View samples on screen.	Yes	No
